

Barriers, Guard Rails and Gates

Barriers, Safety Gates

Highway Style Steel Barrier

Install a Meriton heavy-duty guardrail barrier system and create a protective shield between your workers and your equipment. It's the trouble-free solution to your peace of mind. Built from the best quality materials, our guardrail barriers are strong, adaptable and - when properly installed - engineered to withstand a 10,000-lb impact and 4 mph. View our certified crash test for more information. Meriton heavy-duty guardrail barriers are available in a variety of sizes with single and double-rail options. Choose either standard rails or easy-to-remove lift-out rails that slip into specially designed "saddles" attached to each post.

Modular Square Tube Barriers

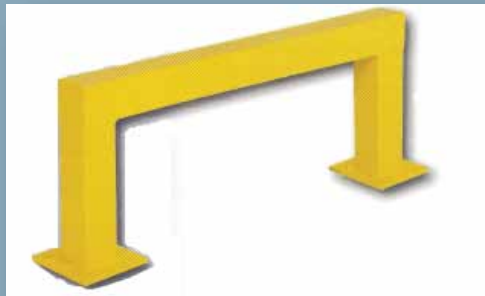

Square tube Protective Barrier is a modular system that is designed to provide maximum protection while allowing easy installation. Heavy gauge square tube crossmembers are bolted to the posts. A U-shaped fitting assists in easy placement and assembly. Available in individual sections or in long configurations with many sections (ideal for pedestrian walkways) they will help to protect your personnel and reduce the risk of accidents.

HD Factory Barriers

Round Tube Curved Protectors

Heavy-duty welded steel construction for protecting racks, building walls, expensive equipment, and hundreds of other applications. All 42" high units include a 21" mid-rail to comply with OSHA requirements. Available with a yellow powder coat or 304 stainless steel polished finish.

Welded Square Tube Guards

These all-steel welded guards provide robust protection for racks, scales, offices and other equipment installed in warehouses. Ask for a complete range of sizes.

Highway Style End of Row Protector

These highway style protectors provide the ultimate in protection for end of racking rows and for tunnels. They are custom designed to fit the rack or application intended.

Barriers, Guard Rails and Gates

HD Factory Barriers
